HF330 is a veritable super high-performance tire. The excellent handling is its label. The pattern and structure are optimized to improve comfortable. At the same time, the technology of RFT is used to ensure driving safety and make travel more safe and environmentally friendly.

HF330 UTQG:280 AAA

Optimized structure, maximized ground area, improved driving stability and handling.

Tread multi-pitch design, simulation optimization, and auxiliary silencer block design to effectively reduce tire noise and enhance comfort performance.

Low-heat-generation support rubber formula to support the tires after the tires deflate.

Imported rayon is used as the skeleton material, with high flexural strength and better stability.

Summer UHP

Comfortable Handling · Silence · Safety

HF330
UTQG:280 AAA

HF330 is a veritable super high-performance tire. The excellent handling is its label. The pattern and structure are optimized to improve comfortable. At the same time, The technology of RFT is used to ensure driving safety and make travel more safe and environmentally friendly.

Optimized structure, maximizes ground area, improved driving stability and handling.

Tread multi-pitch design, simulation optimization, and auxiliary silencer block design to effectively reduce tire noise and enhance comfort performance.

High-grp silicon-containing formula provides better dry / wet road traction, and lower rolling resistance, saving energy and environmental protection.

The widened groove design improves drainage and prevents skidding when driving in rainy weather, improving safety.

Summer UHP

S2000
UTQG:280 AAA

S2000 seeks exercise limit and extreme experience. The excellent high speed ability/handling in both dry and wet conditions, security and green design, make it to be preferred choice for luxury cars. Her stable performance is worthy of your trust.

Special asymmetrical design provides excellent grip and handling in both dry/wet conditions.

The updated SSBP and silica compound provide excellent wet grip, much reduced rolling resistance and terrific handling in high speed.

Stipes on outside shoulder enhance turning handling, and low down nose in high speed.

The dramatic 2 central big grooves with special compound, enhances efficient water evacuation to deal with all conditions.

PracticalMax H/P

RS26

UTQG:300 AA A

RS26 is a top-end luxury tire specially developed for SUVs, which enables your car to have sports car-like handling, high stability and luxury car-like comfort under a variety of road conditions.

Semi-closed groove design on both sides of the tread; lower noise.

Adopting the gradual groove depth design; the pattern block is strong; the stability of the shoulder can optimize the dry grip of the tire.

The asymmetrical pattern design makes the tires have superior grip and braking performance and better handling.

The wide pattern groove design improves drainage performance and effectively avoids the slippage on wet roads.

PERFORMANCE TESTING

The latest formula of solution polymerized styrene and silicon technology makes the grounding area closer, effectively improves wetland performance, reduces rolling resistance and provides excellent handling performance

Validation of bionic technology of road noise analysis of road noise caused by tire driving on rough road, adjustment of tire structure, reduction of road noise

TouringMax+ A/S

H201

UTQG:700 AB

H201 is a high-end touring tire with four seasons pattern. Its super long wearing performance has excellent dry and wet performance. With low heat formula, it can bring safety guarantee for long-distance travel. At the same time, the optimized tire section design greatly improves the driving comfort

Special contour design and formula design are adopted to ensure super long mileage.

Seamless steel wire ring and crown sipe ensure the uniformity of tire and improve the comfort.

Multi sliced design to improve grip and reduce noise.

Four broad grooves provide good drainage performance.

ComfortMax A/S

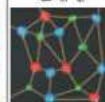

K717 UTQG-420 AA

K717 is specially designed for private car users. The reasonable pattern pitch arrangement and special block design make it have extraordinary silence and excellent wet and dry grip. Its silicon-containing special formula reduces the rolling resistance coefficient, which is more environmentally friendly and fuel efficient. The optimized structural design improves the comfort of the tires and allows you to enjoy a beautiful car life!

Balanced comprehensive performance: silent, fuel-saving, safe and comfortable.

Excellent fuel-saving ability of silicon-containing formula, economical and money-saving.

Four seasons tire design.

Three central ribs ensure stability in straight driving, and asymmetrical pattern design brings better handling.

S801 Summer H/P

Summer H/P

S801

UTQG:420AA

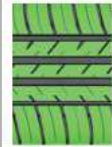

S801 is designed especially for successful people. The advanced asymmetrical tread design brings super silence, excellent grip in wet and dry conditions, handling, and uncommon driving experiences. The silica compound delivers reduced rolling resistance for better fuel efficiency. Sizes from 13" to 17" meet your different demand.

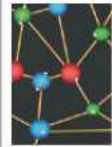

Balanced performance:
Stability, Silence,
Security, Mileage.

Asymmetrical tread design
provides excellent grip and
handling.

Strong block tread design
improves mileage, stability,
and security.

Silica compound delivers
reduced rolling resistance for
better fuel efficiency.

PERFORMANCE TESTING

The latest formula of polybutadiene and silicon-containing technology makes the grounding area more compact, effectively improves wetland performance, reduces rolling resistance, and provides excellent handling performance.

3D pattern groove design, optimized combination of shoulder pattern design, providing comfortable driving experience.

PracticalMax H/T

RS21 is specially designed for the king who constantly pursues sports extremes and enjoys the ultimate driving experience. With its excellent high-speed driving ability, excellent wet and dry road handling performance, and the introduction of safe, environmentally friendly design concepts, consistent and stable performance, it is worthy of your full trust!

RS21 UTQG:500 AA

The grooved step-like design prevents stones from being trapped when driving on country roads.

Rigid and uniform block design, combined with the continuous central ribs, can improve the stability of the tire in straight running.

Decorative three-dimensional step design of shoulder, beautiful and heat dissipation.

The four main grooves cooperate with the horizontal grooves to provide excellent drainage performance and ensure the safety of driving in heavy rain.

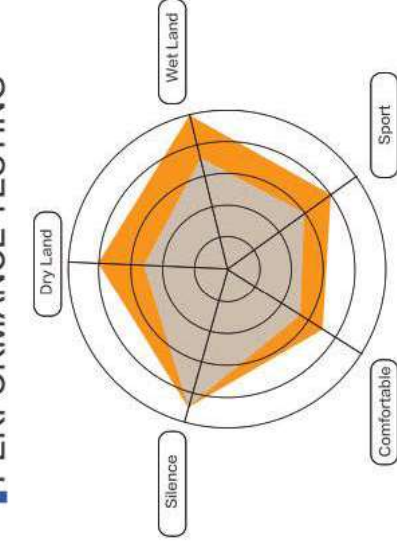

The design of curved fins grooves greatly reduces the water film between the road surface and the tire in rainy days, and prevents the occurrence of water sliding.

PracticalMax A/T

RS23 UTQG:520 AB

RS23 is a SUV tire suitable for all road conditions. While satisfying the performance of paved roads, it highlights the grip and sports performance of non-paved roads such as mountain roads, dirt roads and snow roads. The tiger-tooth pattern design provides powerful off-road performance for the car, and the use of a cut-resistant formula greatly improves the life of the tire pattern.

Tiger tooth-shaped three-dimensional block provides excellent grip performance on paved and non-paved roads.

The mixed pattern groove design guarantees the grip of mountain roads, mud and snow roads.

Special shoulder reinforcement design to prevent non-paved road from damaging the tires and bring you endless driving experience.

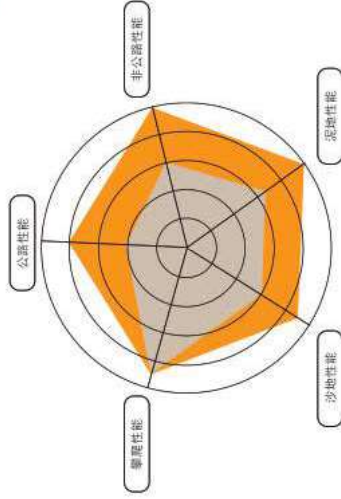

The irregular groove design guarantees the grip and strong off-road ability of non-paved roads.

RS25 15/16/17

RS25 is a special tire for off-road vehicles suitable for non-paved roads. It provides super driving force, grip, dirt road anti-skid performance, and excellent handling for off-road families. Its must-have for the off-road family in the worst of road conditions.

The optimized combination design of huge blocks and grooves provides excellent driving force, grip and anti-skid performance on non-paved roads.

Single winding zig-zag design, which greatly improves the durability, stability of the tire bead.

The double-layer reinforced belt layer and the special specification three-layer reinforced carcass design greatly improve the overall strength of the tire and catch the requirements of the worst road conditions.

The protective dam and rough design on the tire shoulder and the reinforced design of the tire shoulder, to improve the impact resistance of the shoulder, thus greatly improve the durability.

HABLEAD TIRE

HABLEAD TIRE · PURSUE PERFECTION · ENJOY DRIVING

PERFORMANCE TESTING

ABRASION AND DURABILITY
 [Uniform ground pressure design] Suppress shoulder deformation and shoulder wear

LONG SERVICE LIFE
 Optimize the tread rubber formula to strengthen the tread strength and prevent the tread deformation in the later stage of use.

RS01 is designed for taxis. Adopt three grooves and large blocks design, especially the use of ultra-fine carbon black, which greatly improves the abrasion resistance and safety of the tire, reduces the rolling resistance of the tire, and improves operation for taxi drivers while ensuring safety income.

RS01 UTQG:800 A B

Two continuous central rib patterns provide superior abrasion resistance.

Special contour design to prevent tire wear.

The convex surface is designed to bulge outwards to provide superior friction and anti-skid performance for the tire.

Continuous shoulder block design provides superior driving stability and handling performance for cars under high load conditions.

RS01

13/14/15/16

RS01 is a light truck tire for business use, which can meet the overweight test under various extremely harsh conditions. It is specially designed to improve the business operation income

Two continuous central ribs protruding out of tread pattern block provides superior wear resistance.

Special contour design to prevent tire eccentric wear.

The design of convex surface protruding out of tread pattern block provides superior traction performance and anti-sideslip performance for tire.

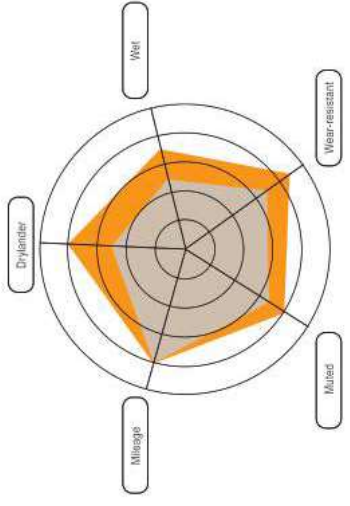

The design of continuous pattern block on the shoulder provides excellent driving stability and handling performance for the vehicle under high load.

Specialty Trailer

RS03
13/14/15/16

RS03 is designed especially for specialty trailer. The Z shape tread blocks provide excellent traction.

- 

4 draining grooves bring excellent drainage.
- 

Soft central blocks and hard Z shape blocks can meet all terrains.
- 

Wider tread brings extra grips and traction.
- 

Thick sidewall and special wearing compound bring long mileage.

PERFORMANCE TESTING

THE DESIGN OF BASE GLUE THICKNESS STRENGTHENING

The thickness of the base rubber is strengthened to prevent the tread groove from cracking

VAN/LTR

RS07
16

RS07 is a kind of SUV and pick-up truck tire with mixed pattern designed for unique climate and environment, which can adapt to all kinds of comprehensive road conditions.

3 draining grooves bring excellent drainage.

Soft central blocks and hard Z shape blocks can meet all terrains.

The design of large three-dimensional decorative steps at the shoulder of the tire provides great heat dissipation capacity, and the tire can cope with the hot and dry climate.

The high toughness and tear resistance formula is designed to ensure the performance of tires in severe environment.

RS27 UTQG:360 B B

RS27 is a kind of SUV and pick-up truck tire with mixed pattern designed for unique climate and environment, which can adapt to all kinds of comprehensive road conditions

The horizontal coarse and fine grooves cooperate with the design of the longitudinal small grooves to maximize the sediment discharge and greatly improve the grip on the sediment ground.

Four main zigzag grooves and transverse grooves provide excellent wet grip performance.

The design of large three-dimensional decorative steps at the shoulder of the tire provides great heat dissipation capacity, and the tire can cope with the hot and dry climate.

The high toughness and tear resistance formula is designed to ensure the performance of tires in severe environment.

PERFORMANCE TESTING

Quiet and comfortable

The design of variable pitch and quick noise elimination in the groove can effectively cut off the air flow and reduce noise; the use of silicon-containing formula makes the vehicle have excellent fuel-saving ability.

ComfortMax

Comfortable Fuel-efficient Quiet Safe

H206 14/15

H206 is designed with noise reduction block + multi-pitch arrangement pattern, which reduces driving noise and improves comfort. It is a passenger car tire for private car owners with safety and comfort at the core.

Balanced comprehensive performance: silent, safe, comfortable and fuel efficient;

Optimized cross-section profile: improves handling stability during driving;

Slender block design: disturbs the high-speed air flow in the groove, reduces the noise caused by the pumping effect, and is more quiet and comfortable;

Variable pitch pattern design: combined with optimized pitch arrangement, can effectively reduce noise during driving and improve driving quality;

Lightweight tire design: the application of new materials such as ultra-high-strength slope wire and single wound bead wire, lightweight tire products, improving comfort and reducing rol resistance;

ALL SEASON

Comfortable Fuel-efficient Quiet Safe

A4 UTQG-420 AA

A4 special all Season product with marvelous overall performance.

Special asymmetrical design provides excellent grip and handling in both dry wet conditions.

The updated SSBP and silica compound provide excellent wet grip, much reduced rolling resistance and terrific handling in high speed.

Wide on outside shoulder enhance turning handling and low down noise in high speed.

The dynamic2 central big groove with special compound enhances efficient water evacuation to deal with all conditions.

PERFORMANCE TESTING

SUPER GRIP

For the tread rubber of previous events, appropriate carbon black increment can enhance the dry grip. Silicon element is added to ensure the grip of the wetland and enhance the adhesion with the road during driving. Get stronger grip. In addition, use polymer hybrid polymer to strengthen colloidal rigidity. To ensure wear resistance.

AT HIGH SPEED
Avoid sticking too much dust, sand and stone to affect the tread friction, so as to ensure stable grip performance and reduce the wear and fuel consumption.

SportMax

S3000

UTQG:200 AAA

S3000 is a drift tyre that pursues high-speed driving control and enjoys endless fun of driving on the street and track.

It adopts the new unique filler and the special tread formula of multifunctional materials to quickly reach the hot road temperature, soften the hardness of the tread, generate viscosity, provide great grip when driving and stability, and prevent skidding when turning.

The specific formula design is applicable to comprehensive track dry track and wet track respectively with tread hardness of 45-88, providing excellent grip and low hardness wear resistance under various extreme conditions.

The cross support design makes the rigidity of the center of the shoulder more moderate distribution, improves the grounding when turning, and ensures the drainage performance.

The enhanced sidewall design can prevent the bulge or damage when the tire collides with the edge of the track. When the tire accelerates, brakes or turns at high speed, it can bear strong longitudinal tension and centrifugal force.

The tire adopts aramid, super strong steel wire and special sidewall rubber to improve tire rigidity, reduce tire roll when cornering and ensure good handling.
